

DIRECTIONS:

Paper aeroplane: Arrow

This plane is easy to fold and flies straight and smooth. Orient the template with the “UP” arrow at the top of the page. Then, flip the paper over onto its backside, so that you cannot see any of the fold lines.

Pull the top right corner down toward you until fold line 1 is visible and crease along the dotted line. Repeat with the top left corner.

Fold the right side over again and crease along fold line 2. Repeat with the left side.

Fold the right side over again and crease along fold line 2. Repeat with the left side. Fold the tip down toward you and crease along fold line 3.

Now, flip the paper over. Fold the pointy end along line 4 so that the point partially covers line 3 and points backwards along line 5. Hold the point down on line 4 with thumb and finger fold the front down along line 4. Then, fold the left side over on to the right side and crease along fold line 5

so that the outside edges of the wings line up.

Fold the right side over again and crease along fold line 6. Repeat with the left side.

Now you're ready to fly.....
